# 1986 Index

## How to Use the Index

In the Subject Index, pages 569–572, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, page 573, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 573–576, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1986, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

## Subject Index

### Aircraft Technology, Conventional, STOL/VTOL

#### *Aerodynamics*

Three-Dimensional Flow Effects in a Two-Dimensional Supersonic Air Intake **B86-088**
Gradual Opening of Skewed Passages in Wave Rotors **B86-063**
Aerodynamics of Small-Scale Vertical-Axis Wind Turbines **B86-046**
Inviscid Modeling of Turbomachinery Wake Transport **B86-027**
An Experimental Study of Tone-Excited Heated Jets **B86-023**

#### *Aeroelasticity*

Wind Turbine Gust Load Alleviation Utilizing Curved Blades **B86-061**
Aerodynamic and Structural Detuning of Supersonic Turbomachine Rotors **B86-025**

#### *Fuels and Fuel Systems*

Film Thickness Measurements in a Simplex Swirl Atomizer **B86-085**
Long-Term Deposit Formation in Aviation Turbine Fuel at Elevated Temperature **B86-076**

#### *Noise*

Benefits of Blade Sweep for Advanced Turboprops **B86-086**
The Effect of Acoustic Reflections on Combustor Noise Measurements **B86-003**

#### *Powerplant Design*

Three-Dimensional Flow Effects in a Two-Dimensional Supersonic Air Intake **B86-088**
Long-Term Deposit Formation in Aviation Turbine Fuel at Elevated Temperature **B86-076**
The Relationship Between Flame Stability and Drag of Bluff-Body Flameholders **B86-059**
Variable Cycle Turboshaft Technology for Rotorcraft of the '90s **B86-010**
A Numerical Method for the Design and Analysis of Counter-Rotating Propellers **B86-008**

#### *Propeller and Rotor Systems*

Benefits of Blade Sweep for Advanced Turboprops **B86-086**
A Numerical Method for the Design and Analysis of Counter-Rotating Propellers **B86-008**

#### *Structural Design (including Loads)*

Procedure for Evaluating Fuel Composition Effects on Combustor Life **B86-060**

#### *Testing, Flight and Ground*

Proposed Laser-Induced Fluorescence Method for Remote Thermometry in Turbine Engines **J86-092**

### Energy

#### *Alternate Fuels*

Long-Term Deposit Formation in Aviation Turbine Fuel at Elevated Temperature **B86-076**

#### *Combustion*

Film Thickness Measurements in a Simplex Swirl Atomizer **B86-085**
Procedure for Evaluating Fuel Composition Effects on Combustor Life **B86-060**
The Relationship Between Flame Stability and Drag of Bluff-Body Flameholders **B86-059**
Mixing, Chemical Reaction, and Flowfield Development in Ducted Rockets **B86-055**
Mean Temperature Field Effect on Acoustic Mode Structure in Dump Combustors **B86-052**
Combustion Wave Structures of Ammonium Perchlorate Composite Propellants **B86-049**
Time-Resolved Pulsed Spray Drop Sizing at Elevated Pressures **B86-022**
Comprehensive Modeling of a Liquid Rocket Combustion Chamber **B86-015**
Swirling Flows in Typical Combustor Geometries **B86-009**
Recent Experiments with the Eindhoven MHD Blowdown Facility **J86-091**

#### *Conservation*

Mobilization of Energy and Space Technology (Durand Lecture for Public Service) **B86-080**

### *Magnetohydrodynamics*

Slag/Seed Interaction in Coal-Fired MHD Generators B86-084
Initial Tests of a Lightweight, Self-Excited MHD Power Generator B86-079
Three-Dimensional Analysis of a Radiant Furnace-Application to Nitric Oxide Decomposition B86-077
Analytical Evaluation of Electrode Potential Drops in MHD Plasmas B86-065
Modeling the Effects of Cathode Wall Nonuniformities in Magnetohydrodynamic Generators B86-033
Observations of Nonequilibrium Electrical Discharge in an MHD Disk Generator B86-020
Electrothermal Stability of Magnetohydrodynamic Plasma under Two-Component Magnetic Field B86-005
A New Approach to Calculation of Three-Dimensional Flow in MHD Generators B86-002

### *Rotating Machinery*

Gradual Opening of Skewed Passages in Wave Rotors B86-063
An Iterative Algorithm Between Stream Function and Density for Transonic Cascade Flow B86-043

### *Solar Thermal Power*

Optimization of Heat Rejection in Space B86-090

### *Wind Power*

Water Channel Experiments of Dynamic Stall on Darrieus Wind Turbine Blades B86-075
Wind Turbine Gust Load Alleviation Utilizing Curved Blades B86-061
Aerodynamics of Small-Scale Vertical-Axis Wind Turbines B86-046
A Local-Circulation Model for Darrieus Vertical-Axis Wind Turbines B86-021

## Fluid Dynamics

### *Aeroacoustics*

Acoustic Control of Free Jet Mixing B86-054
Vortex Driving Mechanism in Oscillatory Rocket Flows B86-035
An Experimental Study of Tone-Excited Heated Jets B86-023
The Effect of Acoustic Reflections on Combustor Noise Measurements B86-003

### *Boundary Layers and Convective Heat Transfer-Turbulent*

Procedure for Evaluating Fuel Composition Effects on Combustor Life B86-060
Computation of Turbulent Flows on Rotating Bodies and Ducts B86-047
Computation of Viscous Flows in Turbomachinery Cascades with a Space-Marching Method B86-044

### *Computational Methods*

Real Gas Effects on the Numerical Simulation of a Hypersonic Inlet B86-064
Three-Dimensional Inviscid Flow in Mixers, Part II: Analysis of Turbofan Forced Mixers B86-056
Mixing, Chemical Reaction, and Flowfield Development in Ducted Rockets B86-055
Computation of Turbulent Flows on Rotating Bodies and Ducts B86-047
Three-Dimensional Inviscid Flow in Mixers, Part I: Mixer Analysis Using a Cartesian Grid B86-045
Computation of Viscous Flows in Turbomachinery Cascades with a Space-Marching Method B86-044
An Iterative Algorithm Between Stream Function and Density for Transonic Cascade Flow B86-043
Initial Conditions for Parabolic Calculation of Reacting Flows B86-039
A Local-Circulation Model for Darrieus Vertical-Axis Wind Turbines B86-021
Comprehensive Modeling of a Liquid Rocket Combustion Chamber B86-015
Modeling Dilution Jet Flowfields B86-001

### *Jets, Wakes, and Viscid-Inviscid Flow Interactions*

Three-Dimensional Flow Effects in a Two-Dimensional Supersonic Air Intake B86-088
The Relationship Between Flame Stability and Drag of Bluff-Body Flameholders B86-059
Vortex Modeling of Single and Multiple Dilution Jet Mixing in a Cross Flow B86-058
Acoustic Control of Free Jet Mixing B86-054
Thrust Augmentor Inlet Optimization B86-042
Inviscid Modeling of Turbomachinery Wake Transport B86-027
An Experimental Study of Tone-Excited Heated Jets B86-023
Modeling Dilution Jet Flowfields B86-001

### *Multiphase Flows*

Slag/Seed Interaction in Coal-Fired MHD Generators B86-084
Development of an Advanced Vaneless Inlet Particle Separator for Helicopter Engines B86-074
A Stagnation Pressure Probe for Droplet-Laden Air Flow B86-032
Time-Resolved Pulsed Spray Drop Sizing at Elevated Pressures B86-022
Comprehensive Modeling of a Liquid Rocket Combustion Chamber B86-015

### *Nonsteady Aerodynamics*

Stall Transients of Axial Compression Systems with Inlet Distortion B86-089
Water Channel Experiments of Dynamic Stall on Darrieus Wind Turbine Blades B86-075
Acoustic Control of Free Jet Mixing B86-054
Vortex Driving Mechanism in Oscillatory Rocket Flows B86-035
Unsteady Blade Row Interactions in a Multistage Compressor B86-026
Aerodynamic and Structural Detuning of Supersonic Turbomachine Rotors B86-025

### *Nozzle and Channel Flow*

An Analytical Investigation of Swirl in Annular Propulsive Nozzles B86-024
Rocket Thrust Perturbation from Discharge of an Inert Body B86-018
Thrust Improvement with Ablative Insert Nozzle Extension B86-012
Calculation of Three-Dimensional, Viscous Flow Through Turbomachinery Blade Passage by Parabolic Marching B86-011
A New Approach to Calculation of Three-Dimensional Flow in MHD Generators B86-002

### *Plasmadynamics and MHD*

Slag/Seed Interaction in Coal-Fired MHD Generators B86-084
Initial Tests of a Lightweight, Self-Excited MHD Power Generator B86-079
Critical Speed and Voltage-Current Characteristics in Self-Field Plasma Thrusters B86-068
Analytical Evaluation of Electrode Potential Drops in MHD Plasmas B86-065
MPD Thruster Performance: Propellant Distribution and Species Effects B86-053
Modeling the Effects of Cathode Wall Nonuniformities in Magnetohydrodynamic Generators B86-033
Electrothermal Stability of Magnetohydrodynamic Plasma under Two-Component Magnetic Field B86-005
A New Approach to Calculation of Three-Dimensional Flow in MHD Generators B86-002

### *Radiatively Coupled Flows and Heat Transfer*

Numerical Solution of Strong Radiation Gasdynamic Interactions in a Hydrogen-Seedant Mixture B86-078

### *Reactive Flows*

Three-Dimensional Analysis of a Radiant Furnace-Application to Nitric Oxide Decomposition B86-077
Mixing, Chemical Reaction, and Flowfield Development in Ducted Rockets B86-055
Initial Conditions for Parabolic Calculation of Reacting Flows B86-039

### *Shock Waves and Detonations*

Supersonic Inlet Study Using the Navier-Stokes Equations B86-028

### *Subsonic Flow*

An Approximation for Fully Stalled Cascades B86-029
Calculation of Three-Dimensional, Viscous Flow Through Turbomachinery Blade Passage by Parabolic Marching B86-011

### *Supersonic and Hypersonic Flow*

Real Gas Effects on the Numerical Simulation of a Hypersonic Inlet B86-064

### *Transonic Flow*

An Iterative Algorithm Between Stream Function and Density for Transonic Cascade Flow B86-043

### *Viscous Nonboundary-Layer Flows*

Thrust Augmentor Inlet Optimization B86-042
An Approximation for Fully Stalled Cascades B86-029

### *Wave Motion and Sloshing*

Coupling Between Acoustic Velocity Oscillations and Solid-Propellant Combustion B86-073
Mean Temperature Field Effect on Acoustic Mode Structure in Dump Combustors B86-052

## Interdisciplinary Topics

### *Aerospace Management*

Mobilization of Energy and Space Technology (Durand Lecture for Public Service) B86-080

### *Analytical and Numerical Methods*

Three-Dimensional Analysis of a Radiant Furnace-Application to Nitric Oxide Decomposition B86-077

### *Lasers and Laser Applications*

Approach for Obtaining Unbiased Laser Doppler Velocimetry Data in Highly Turbulent Flows B86-087

### *Reliability, Maintainability, and Logistics Support*

Surface Layer Activation Technique for Monitoring and In Situ Wear Measurement of Turbine Components B86-041
An Exploratory Study of Retirement for Cause for Gas Turbine Engine Components B86-006

### *Research Facilities and Instrumentation*

Surface Layer Activation Technique for Monitoring and In Situ Wear Measurement of Turbine Components B86-041
A Stagnation Pressure Probe for Droplet-Laden Air Flow B86-032

## Launch Vehicle and Missile (LV/M) Technology

### *Propulsion and Propellant Systems*

A Novel Smokeless, Nonflaking Solid Propellant Inhibitor B86-062
MPD Thruster Performance: Propellant Distribution and Species Effects B86-053
Acceptance Test for Tanks Used for Storage of Hydrazine B86-048
Rocket Thrust Perturbation from Discharge of an Inert Body B86-018
Thrust Improvement with Ablative Insert Nozzle Extension B86-012

### *Structural Design (including Loads)*

Finite Element Application to Rocket Nozzle Aeroelasticity B86-081

## Propulsion

### *Airbreathing Propulsion*

Stall Transients of Axial Compression Systems with Inlet Distortion B86-089
Approach for Obtaining Unbiased Laser Doppler Velocimetry Data in Highly Turbulent Flows B86-087
Development of an Advanced Vaneless Inlet Particle Separator for Helicopter Engines B86-074
Combustion Studies of Metallized Fuels for Solid-Fuel Ramjets B86-072
Real Gas Effects on the Numerical Simulation of a Hypersonic Inlet B86-064
Gradual Opening of Skewed Passages in Wave Rotors B86-063
Vortex Modeling of Single and Multiple Dilution Jet Mixing in a Cross Flow B86-058
Three-Dimensional Inviscid Flow in Mixers, Part II: Analysis of Turbofan Forced Mixers B86-056
Mean Temperature Field Effect on Acoustic Mode Structure in Dump Combustors B86-052
Fuel Regression and Flame Stabilization Studies of Solid-Fuel Ramjets B86-050
Computation of Turbulent Flows on Rotating Bodies and Ducts B86-047
Three-Dimensional Inviscid Flow in Mixers, Part I: Mixer Analysis Using a Cartesian Grid B86-045
Computation of Viscous Flows in Turbomachinery Cascades with a Space-Marching Method B86-044
Radiative Transfer in a Gas-Turbine Combustor B86-040
Identification of Longitudinal Acoustic Modes Associated with Pressure Oscillations in Ramjets B86-034
A Stagnation Pressure Probe for Droplet-Laden Air Flow B86-032
An Approximation for Fully Stalled Cascades B86-029
Supersonic Inlet Study Using the Navier-Stokes Equations B86-028
Unsteady Blade Row Interactions in a Multistage Compressor B86-026
Aerodynamic and Structural Detuning of Supersonic Turbomachine Rotors B86-025
An Analytical Investigation of Swirl in Annular Propulsive Nozzles B86-024
Longitudinal Combustion Instabilities in Ramjet Engines: Identification of Acoustic Modes B86-016
Calculation of Three-Dimensional, Viscous Flow Through Turbomachinery Blade Passage by Parabolic Marching B86-011
Variable Cycle Turboshaft Technology for Rotorcraft of the '90s B86-010
Swirling Flows in Typical Combustor Geometries B86-009
A Numerical Method for the Design and Analysis of Counter-Rotating Propellers B86-008
An Exploratory Study of Retirement for Cause for Gas Turbine Engine Components B86-006
A Comparison of Scramjet Integral Analysis Techniques B85-024

### *Combustion and Combustor Designs*

Film Thickness Measurements in a Simplex Swirl Atomizer B86-085
Combustion Studies of Metallized Fuels for Solid-Fuel Ramjets B86-072
Vortex Modeling of Single and Multiple Dilution Jet Mixing in a Cross Flow B86-058
Combustion Wave Structures of Ammonium Perchlorate Composite Propellants B86-049
Radiative Transfer in a Gas-Turbine Combustor B86-040
Studies on Coning in End-Burning Rocket Motors B86-037
An Analytical Investigation of Swirl in Annular Propulsive Nozzles B86-024
Swirling Flows in Typical Combustor Geometries B86-009
Evaluation of Cold Isostatic Pressing of High-Pressure Thrust Chamber Closeout B86-004
The Effect of Acoustic Reflections on Combustor Noise Measurements B86-003
Modeling Dilution Jet Flowfields B86-001

### *Combustion Stability, Ignition, and Detonation*

Coupling Between Acoustic Velocity Oscillations and Solid-Propellant Combustion B86-073
Flow Turning and Admittance Correction: An Experimental Comparison B86-057
Fuel Regression and Flame Stabilization Studies of Solid-Fuel Ramjets B86-050
Ultrasonic Measurements of Solid Propellant Burning Rates in Nozzleless Rocket Motors B86-036
Vortex Driving Mechanism in Oscillatory Rocket Flows B86-035
Identification of Longitudinal Acoustic Modes Associated with Pressure Oscillations in Ramjets B86-034
Blowdown Pulser Design Criteria for Solid-Propellant Rockets B86-017
Longitudinal Combustion Instabilities in Ramjet Engines: Identification of Acoustic Modes B86-016

### *Electric and Advanced Space Propulsion*

ETS-III Ion Engine Flight Operations in the Extended Mission Period B86-083
Application of MPD Thruster Systems to Interplanetary Missions B86-082
Numerical Solution of Strong Radiation Gasdynamic Interactions in a Hydrogen-Seedant Mixture B86-078
Experimental Study on a Low-Power Direct Current Arcjet B86-070
Quasisteady MPD Arcjet with Hollow Cathode B86-069
Critical Speed and Voltage-Current Characteristics in Self-Field Plasma Thrusters B86-068
Ring Cusp Discharge Chamber Performance Organization B86-067
Vacuum Chamber Pressure Effects on Thrust Measurements of Low Reynolds Number Nozzles B86-066
MPD Thruster Performance: Propellant Distribution and Species Effects B86-053
Hybrid Electric Chemical Propulsion B86-019
Thermal Analysis of a Magnetic Induction Thruster B86-007

### *Engine Performance*

Stall Transients of Axial Compression Systems with Inlet Distortion B86-089
Thrust Improvement with Ablative Insert Nozzle Extension B86-012
Variable Cycle Turboshaft Technology for Rotorcraft of the '90s B86-010
A Comparison of Scramjet Integral Analysis Techniques B85-024
Proposed Laser-Induced Fluorescence Method for Remote Thermometry in Turbine Engines J86-092

### *Environmental Effects*

Development of an Advanced Vaneless Inlet Particle Separator for Helicopter Engines B86-074

### *Fuels and Propellants, Properties of*

Combustion Studies of Metallized Fuels for Solid-Fuel Ramjets B86-072
Solid Propellant Combustion Zone Structure from Analysis of Hydroxyl Radical Chemiluminescence B86-071
A Novel Smokeless, Nonflaking Solid Propellant Inhibitor B86-062

Flow Turning and Admittance Correction: An Experimental Comparison B86-057
Combustion Wave Structures of Ammonium Perchlorate Composite Propellants B86-049
Acceptance Test for Tanks Used for Storage of Hydrazine B86-048
Studies on Coning in End-Burning Rocket Motors B86-037
Ultrasonic Measurements of Solid Propellant Burning Rates in Nozzleless Rocket Motors B86-036
Effect of Temperature on the Burning Rate of Solid Propellants: A Review B86-031
Recent Experiments with the Eindhoven MHD Blowdown Facility J86-091

### *Liquid Rocket Engines and Missile Systems*

Vacuum Chamber Pressure Effects on Thrust Measurements of Low Reynolds Number Nozzles B86-066
Evaluation of Cold Isostatic Pressing of High-Pressure Thrust Chamber Closeout B86-004

### *Solid and Hybrid Rocket Engines*

Coupling Between Acoustic Velocity Oscillations and Solid-Propellant Combustion B86-073
Flow Turning and Admittance Correction: An Experimental Comparison B86-057
Experimental Investigation of Combustion Efficiency of Air-Augmented Rockets B86-051
Fuel Regression and Flame Stabilization Studies of Solid-Fuel Ramjets B86-050
Investigation of High Pressure Solid Propellant Combustion Chemistry Using Emission Spectroscopy B86-038
Studies on Coning in End-Burning Rocket Motors B86-037
Ultrasonic Measurements of Solid Propellant Burning Rates in Nozzleless Rocket Motors B86-036
Rocket Thrust Perturbation from Discharge of an Inert Body B86-018
Blowdown Pulser Design Criteria for Solid-Propellant Rockets B86-017

## Spacecraft Technology

### *Electric Power*

Optimization of Heat Rejection in Space B86-090

### *Mission Analysis*

Application of MPD Thruster Systems to Interplanetary Missions B86-082

### *Temperature Control*

Optimization of Heat Rejection in Space B86-090

### *Testing, Flight and Ground*

Vacuum Chamber Pressure Effects on Thrust Measurements of Low Reynolds Number Nozzles B86-066

## Structural Mechanics and Materials

### *Aeroelasticity and Hydroelasticity*

Finite Element Application to Rocket Nozzle Aeroelasticity B86-081
Wind Turbine Gust Load Alleviation Utilizing Curved Blades B86-061

### *Materials, Properties of*

Effect of Temperature on the Burning Rate of Solid Propellants: A Review B86-031

### *Structural Durability (including Fatigue and Fracture)*

An Exploratory Study of Retirement for Cause for Gas Turbine Engine Components B86-006

### *Structural Dynamics*

Finite Element Application to Rocket Nozzle Aeroelasticity B86-081
Recent Experiments with the Eindhoven MHD Blowdown Facility J86-091

### *Thermal Stresses*

Evaluation of Cold Isostatic Pressing of High-Pressure Thrust Chamber Closeout B86-004

## Thermophysics and Thermochemistry

### *Ablation, Pyrolysis, Thermal Decomposition and Degradation (including Refractories)*

Effect of Temperature on the Burning Rate of Solid Propellants: A Review B86-031

### *Experimental Methods of Diagnostics*

Solid Propellant Combustion Zone Structure from Analysis of Hydroxyl Radical Chemiluminescence B86-071
Investigation of High Pressure Solid Propellant Combustion Chemistry Using Emission Spectroscopy B86-038
Proposed Laser-Induced Fluorescence Method for Remote Thermometry in Turbine Engines J86-092

### *Radiation and Radiative Heat Transfer*

Radiative Transfer in a Gas-Turbine Combustor B86-040

### *Thermochemistry and Chemical Kinetics*

A Comparison of Scramjet Integral Analysis Techniques B85-024

# Chronological Index

**B85-024 A Comparison of Scramjet Integral Analysis Techniques.** G. A. Sullins and P. J. Waltrup, *The Johns Hopkins University Applied Physics Laboratory* (1, 2, p. 156) Technical Note

Technical Comment by Griffin Y. Anderson, *NASA Langley Research Center* (2, 1, p. 94)

Reply (2, 1, p. 95)

**B86-001 Modeling Dilution Jet Flowfields.** J. D. Holdeman, *NASA Lewis Research Center*; and R. Srinivasan, *The Garrett Turbine Engine Company* (2, 1, p. 4) Article based on AIAA Paper 84-1379

**B86-002 A New Approach to Calculation of Three-Dimensional Flow in MHD Generators.** Motoo Ishikawa and Juro Umoto, *Kyoto University* (2, 1, p. 11) Article

**B86-003 The Effect of Acoustic Reflections on Combustor Noise Measurements.** Ronald G. Huff, *NASA Lewis Research Center* (2, 1, p. 18) Article based on AIAA Paper 84-2323

**B86-004 Evaluation of Cold Isostatic Pressing of High-Pressure Thrust Chamber Closeout.** M. Niino and A. Kumakawa, *National Aerospace Laboratory, Japan*; R. Watanabe, *Tohoku University, Japan*; and Y. Doi, *Sumitomo Electric Industries Ltd., Japan* (2, 1, p. 25) Article based on AIAA Paper 84-1227

**B86-005 Electrothermal Stability of Magnetohydrodynamic Plasma under Two-Component Magnetic Field.** Naoyuki Kayukawa, *Hokkaido University, Japan* (2, 1, p. 31) Article

**B86-006 An Exploratory Study of Retirement for Cause for Gas Turbine Engine Components.** J. N. Yang and Shiung Chen,

*The George Washington University* (2, 1, p. 38) Article based on AIAA Paper 84-1220

**B86-007 Thermal Analysis of a Magnetic Induction Thruster.** C. J. Zang and M. M. Micci, *The Pennsylvania State University* (2, 1, p. 50) Article

**B86-008 A Numerical Method for the Design and Analysis of Counter-Rotating Propellers.** S. C. Playle, K. D. Korkan and E. von Lavante, *Texas A&M University* (2, 1, p. 57) Article based on AIAA Paper 84-1205

**B86-009 Swirling Flows in Typical Combustor Geometries.** David G. Lilley, *Oklahoma State University* (2, 1, p. 64) Article based on AIAA Paper 85-0184

**B86-010 Variable Cycle Turboshaft Technology for Rotorcraft of the '90s.** C. Rogo and E. H. Benstein, *Teledyne CAE* (2, 1, p. 73) Article based on AIAA Paper 85-1278

**B86-011 Calculation of Three-Dimensional, Viscous Flow Through Turbomachinery Blade Passage by Parabolic Marching.** Theodore Katsanis, *NASA Lewis Research Center* (2, 1, p. 81) Article based on AIAA Paper 85-1405

**B86-012 Thrust Improvement with Ablative Insert Nozzle Extension.** Richard M. Clayton, *Jet Propulsion Laboratory, California Institute of Technology*; and Lloyd H. Back, *Jet Propulsion Laboratory, California Institute of Technology* (2, 1, p. 91) Technical Note

**B86-015 Comprehensive Modeling of a Liquid Rocket Combustion Chamber.** Pak-Yan Liang, Steven Fisher and Y. Mason Chang, *Rockwell International* (2, 2, p. 97) Article based on AIAA Paper 85-0232

**B86-016 Longitudinal Combustion Instabilities in Ramjet Engines: Identification of Acoustic Modes.** James E. Crump and Klaus C. Schadow, *Naval Weapons Center*; Vigor Yang and Fred E. C. Culick, *California Institute of Technology* (2, 2, p. 105) Article

**B86-017 Blowdown Pulser Design Criteria for Solid-Propellant Rockets.** R. S. Brown, *United Technologies Chemical Systems Division* (2, 2, p. 110) Article

**B86-018 Rocket Thrust Perturbation from Discharge of an Inert Body.** John W. Murdock, *The Aerospace Corporation* (2, 2, p. 117) Article

**B86-019 Hybrid Electric Chemical Propulsion.** J. E. Pollard and R. B. Cohen, *The Aerospace Corporation* (2, 2, p. 124) Article based on AIAA Paper 85-1227

**B86-020 Observations of Nonequilibrium Electrical Discharge in an MHD Disk Generator.** Nobuhiro Harada, Hiroyuki Yamasaki and Susumu Shioda, *Tokyo Institute of Technology, Japan* (2, 2, p. 129) Article

**B86-021 A Local-Circulation Model for Darrieus Vertical-Axis Wind Turbines.** Bernard Massé, *Institut de Recherche d'Hydro-Québec, Canada* (2, 2, p. 135) Article

**B86-022 Time-Resolved Pulsed Spray Drop Sizing at Elevated Pressures.** J. A. Drallmeier and J. E. Peters, *University of Illinois, Urbana-Champaign* (2, 2, p. 142) Article

**B86-023 An Experimental Study of Tone-Excited Heated Jets.** J. Lepicovsky, K. K. Ahuja and M. Salikuddin, *Lockheed-Georgia Company* (2, 2, p. 149) Article based on AIAA Paper 84-2341

**B86-024 An Analytical Investigation of Swirl in Annular Propulsive Nozzles.** Barbara T. Kornblum, H. Doyle Thompson and Joe D. Hoffman, *Purdue University* (2, 2, p. 155) Article based on AIAA Paper 85-0364

**B86-025 Aerodynamic and Structural Detuning of Supersonic Turbomachine Rotors.** Daniel Hoyniak, *NASA Lewis Research Center*; and Sanford Fleeter, *Purdue University* (2, 2, p. 161) Article based on AIAA Paper 85-0761 CP851

**B86-026 Unsteady Blade Row Interactions in a Multistage Compressor.** V. R. Capece, S. R. Manwaring and S. Fleeter, *Purdue University* (2, 2, p. 168) Article based on AIAA Paper 85-1134

**B86-027 Inviscid Modeling of Turbomachinery Wake Transport.** H. D. Joslyn, J. R. Caspar and R. P. Dring, *United Technologies Research Center* (2, 2, p. 175) Article based on AIAA Paper 85-1132

**B86-028 Supersonic Inlet Study Using the Navier-Stokes Equations.** Louis G. Hunter, John M. Tripp and Douglas G. Howlett, *General Dynamics Corporation* (2, 2, p. 181) Article based on AIAA Paper 85-1211

**B86-029 An Approximation for Fully Stalled Cascades.** H. L. Moses, *Virginia Polytechnic Institute and State University*; and S. B. Thomason, *Memphis State University* (2, 2, p. 188) Technical Note

**B86-030 Correlation of Lean Blowoff in an Annular Combustor.** T. A. Jarymowycz and A. M. Mellor, *Drexel University* (2, 2, p. 190) Technical Note

**B86-031 Effect of Temperature on the Burning Rate of Solid Propellants: A Review.** K. Kishore and K. Sridhara, *Indian Institute of Science* (2, 3, p. 193) Synoptic

**B86-032 A Stagnation Pressure Probe for Droplet-Laden Air Flow.** S. N. B. Murthy, M. Leonardo and C. M. Ehresman, *Purdue University* (2, 3, p. 195) Synoptic based on AIAA Paper 85-0330

**B86-033 Modeling the Effects of Cathode Wall Nonuniformities in Magnetohydrodynamic Generators.** I. Sadovnik and C. C. P. Pian, *Avco Everett Research Laboratory Inc.* (2, 3, p. 197) Synoptic

**B86-034 Identification of Longitudinal Acoustic Modes Associated with Pressure Oscillations in Ramjets.** W. H. Clark, *Naval Weapons Center*; and J. W. Humphrey, *California Institute of Technology* (2, 3, p. 199) Article based on AIAA Paper 84-1405

**B86-035 Vortex Driving Mechanism in Oscillatory Rocket Flows.** G. A. Flandro, *Georgia Institute of Technology* (2, 3, p. 206) Article

**B86-036 Ultrasonic Measurements of Solid Propellant Burning Rates in Nozzleless Rocket Motors.** Jean-Claude Traineau, *Office National d'Etudes et de Recherches Aérospatiales, France*; and Paul Kuentzmann, *Office National d'Etudes et de Recherches Aerospatiales, France* (2, 3, p. 215) Article based on AIAA Paper 84-1469

**B86-037 Studies on Coning in End-Burning Rocket Motors.** W. H. Jolley, J. F. Hooper, P. R. Hilton and W. A. Bradfield, *Defence Science and Technology Organisation, Department of Defence, South Australia* (2, 3, p. 223) Article based on AIAA Paper 85-1179

**B86-038 Investigation of High Pressure Solid Propellant Combustion Chemistry Using Emission Spectroscopy.** T. Edwards and D. P. Weaver, *Air Force Rocket Propulsion Laboratory, Edwards Air Force Base*; D. H. Campbell and S. Hulsizer, *University of Dayton Research Institute, Edwards Air Force Base* (2, 3, p. 228) Article

**B86-039 Initial Conditions for Parabolic Calculation of Reacting Flows.** Eugene F. Brown, *Virginia Polytechnic and State University*; and R. Clayton Rogers, *NASA Langley Research Center* (2, 3, p. 235) Article based on AIAA Paper 85-1251

**B86-040 Radiative Transfer in a Gas-Turbine Combustor.** M.P. Mengüac, W.G.III Cummings and R. Viskanta, *Purdue University* (2, 3, p. 241) Article based on AIAA Paper 85-1072

**B86-041 Surface Layer Activation Technique for Monitoring and In Situ Wear Measurement of Turbine Components.** Charles C. Blatchley and Piran Sioshansi, *Spire Corporation* (2, 3, p. 248) Article

**B86-042 Thrust Augmentor Inlet Optimization.** T. S. Lund, D. A. Tavella and L. Roberts, *Stanford University* (2, 3, p. 253) Article based on AIAA Paper 85-0110

**B86-043 An Iterative Algorithm Between Stream Function and Density for Transonic Cascade Flow.** Bao-Guo Wang, *Chinese Academy of Sciences* (2, 3, p. 259) Article

**B86-044 Computation of Viscous Flows in Turbomachinery Cascades with a Space-Marching Method.** M. Pouagare, B. Lakshminarayana and T. R. Govindan, *The Pennsylvania State University* (2, 3, p. 266) Article

**B86-045 Three-Dimensional Inviscid Flow in Mixers, Part I: Mixer Analysis Using a Cartesian Grid.** T. J. Barber, *United Technologies Research Center*; G. L. Muller and S. M. Ramsay, *Pratt & Whitney Aircraft Group*; and E. M. Murman, *Massachusetts Institute of Technology* (2, 3, p. 275) Article

**B86-046 Aerodynamics of Small-Scale Vertical-Axis Wind Turbines.** Ion Paraschivoiu and Phillipe Dësy, *École Polytechnique de Montreal, Canada* (2, 3, p. 282) Article

**B86-047 Computation of Turbulent Flows on Rotating Bodies and Ducts.** M. Pouagare and B. Lakshminarayana, *Pennsylvania State University* (2, 4, p. 289) Synoptic

**B86-048 Acceptance Test for Tanks Used for Storage of Hydrazine.** Derek Sutton, *Royal Ordnance, Westcott, England* (2, 4, p. 291) Article based on AIAA Paper 85-1299

**B86-049 Combustion Wave Structures of Ammonium Perchlorate Composite Propellants.** N. Kubota, *Japan Defense Agency*; T. Kuwahara and S. Miyazaki, *Nissan Motor Co., Ltd., Japan*; K. Uchiyama, *Nippon Oil and Fats Co., Ltd., Japan*; and N. Hirata, *Daicel Chemical Industries, Ltd., Japan* (2, 4, p. 296) Article

**B86-050 Fuel Regression and Flame Stabilization Studies of Solid-Fuel Ramjets.** G. Schulte, *Deutsche Forschungs-und Versuchsanstalt für Luft-und Raumfahrt e.V., Federal Republic of Germany* (2, 4, p. 301) Article

**B86-051 Experimental Investigation of Combustion Efficiency of Air-Augmented Rockets.** Zhang Zhongqin, Zhang Zhenpeng, Tao Jinfu and Feng Wenlan, *Beijing Institute of Aeronautics and Astronautics, China* (2, 4, p. 305) Article based on AIAA Paper 85-1314

**B86-052 Mean Temperature Field Effect on Acoustic Mode Structure in Dump Combustors.** A. M. Laverdant, *Office National d'Etudes et de Recherches Aérospatiales, France*; and T. Poinsot, *Centre National de la Recherche Scientifique, France* (2, 4, p. 311) Article based on AIAA Paper 85-1249

**B86-053 MPD Thruster Performance: Propellant Distribution and Species Effects.** D. J. Merfeld, A. J. Kelley and R. G. Jahn, *Princeton University* (2, 4, p. 317) Article based on AIAA Paper 85-2072

**B86-054 Acoustic Control of Free Jet Mixing.** J. Lepicovsky, K. K. Ahuja, W. H. Brown and P. J. Morris, *Lockheed-Georgia Company* (2, 4, p. 323) Article based on AIAA Paper 85-0569

**B86-055 Mixing, Chemical Reaction, and Flowfield Development in Ducted Rockets.** S. P. Vanka, *Argonne National Laboratory*; R. R. Craig and F. D. Stull, *Air Force Wright Aeronautical Laboratories, Wright-Patterson Air Force Base* (2, 4, p. 331) Article based on AIAA Paper 85-1271

**B86-056 Three-Dimensional Inviscid Flow in Mixers, Part II: Analysis of Turbofan Forced Mixers.** T. J. Barber, *United Technologies Research Center*; G. L. Muller and S. M. Ramsay, *Pratt & Whitney Aircraft Group*; and E. M. Murman, *Massachusetts Institute of Technology* (2, 4, p. 339) Article

**B86-057 Flow Turning and Admittance Correction: An Experimental Comparison.** F. Vuillot and P. Kuentzmann, *Office National d'Etudes et de Recherches Aérospatiales, France* (2, 4, p. 345) Article based on AIAA Paper 85-1484

**B86-058 Vortex Modeling of Single and Multiple Dilution Jet Mixing in a Cross Flow.** A. R. Karagozian, T. T. Nguyen and C. N. Kim, *University of California, Los Angeles* (2, 4, p. 354) Article

**B86-059 The Relationship Between Flame Stability and Drag of Bluff-Body Flameholders.** N. K. Rizk and A. H. Lefebvre, *Purdue University* (2, 4, p. 361) Article

**B86-060 Procedure for Evaluating Fuel Composition Effects on Combustor Life.** Howard L. Foltz and Milton J. Kenworthy, *General Electric Company* (2, 4, p. 366) Article

**B86-061 Wind Turbine Gust Load Alleviation Utilizing Curved Blades.** Bradley S. Liebst, *University of Minnesota, Minneapolis* (2, 4, p. 371) Article

**B86-062 A Novel Smokeless, Nonflaking Solid Propellant Inhibitor.** Janet L. Laird and Roger J. Becker, *University of Dayton* (2, 4, p. 378) Technical Note

**B86-063 Gradual Opening of Skewed Passages in Wave Rotors.** Shmuel Eidelman, *Science Applications International Corporation* (2, 4, p. 379) Technical Note

**B86-064 Real Gas Effects on the Numerical Simulation of a Hypersonic Inlet.** Wing-Fai Ng, *Virginia Polytechnic and State University*; Thomas J. Benson and William G. Kunik, *NASA Lewis Research Center* (2, 4, p. 381) Technical Note

**B86-065 Analytical Evaluation of Electrode Potential Drops in MHD Plasmas.** Bhumesh Gupta and G. V. R. Raju, *Indian Institute of Technology* (2, 4, p. 383) Technical Note

**B86-066 Vacuum Chamber Pressure Effects on Thrust Measurements of Low Reynolds Number Nozzles.** James S. Sovey, Paul F. Penko, Stanley P. Grisnik and Margaret V. Whalen, *NASA Lewis Research Center* (2, 5, p. 385) Article

**B86-067 Ring Cusp Discharge Chamber Performance Organization.** Jeffrey M. Hiatt and Paul J. Wilbur, *Colorado State University* (2, 5, p. 390) Article based on AIAA Paper 85-0007

**B86-068 Critical Speed and Voltage-Current Characteristics in Self-Field Plasma Thrusters.** P. J. Turchi, *RDA Washington Research Laboratory* (2, 5, p. 398) Article

**B86-069 Quasisteady MPD Arcjet with Hollow Cathode.** K. Toki, *Institute of Space and Astronautical Science, Japan* (2, 5, p. 402) Article based on AIAA Paper 85-2057

**B86-070 Experimental Study on a Low-Power Direct Current Arcjet.** Hitoshi Kuninaka, Masahiro Ishii and Kyoichi Kuriki, *Institute of Space and Astronautical Science, Japan* (2, 5, p. 408) Article

**B86-071 Solid Propellant Combustion Zone Structure from Analysis of Hydroxyl Radical Chemiluminescence.** D. H. Campbell and S. Hulsizer, *University of Dayton Research Institute, AFRPL, Edwards Air Force Base*; T. Edwards and D. P. Weaver, *AFRPL, Edwards Air Force Base* (2, 5, p. 414) Article

**B86-072 Combustion Studies of Metallized Fuels for Solid-Fuel Ramjets.** Alon Gany, *Technion–Israel Institute of Technology*; and David W. Netzer, *Naval Postgraduate School* (2, 5, p. 423) Article

**B86-073 Coupling Between Acoustic Velocity Oscillations and Solid-Propellant Combustion.** R. S. Brown, A. M. Blackner, P. G. Willoughby and R. Dunlap, *United Technologies Corporation* (2, 5, p. 428) Article

**B86-074 Development of an Advanced Vaneless Inlet Particle Separator for Helicopter Engines.** B. V. R. Vittal, D. L. Tipton and W. A. Bennett, *General Motors Corporation* (2, 5, p. 438) Article based on AIAA Paper 85-1277

**B86-075 Water Channel Experiments of Dynamic Stall on Darrieus Wind Turbine Blades.** G. Brochier, *Institut de Méchanique et Statistique de la Turbulence (IMST), France*; P. Fraunié and C. Béguier, *Institut de Méchanique et Statistique (IMST), France*; and I. Paraschivoiu, *Ecole Polytechnique de Montréal, Canada* (2, 5, p. 445) Article

**B86-076 Long-Term Deposit Formation in Aviation Turbine Fuel at Elevated Temperature.** A. J. Giovanetti and E. J. Szetela, *United Technologies Research Center* (2, 5, p. 450) Article based on AIAA Paper 85-0525

**B86-077 Three-Dimensional Analysis of a Radiant Furnace-Application to Nitric Oxide Decomposition.** R. W. Lyczkowski, C. S. Wang, L. S. H. Chow, T. R. Johnson and G. F. Berry, *Argonne National Laboratory* (2, 5, p. 457) Article

**B86-078 Numerical Solution of Strong Radiation Gasdynamic Interactions in a Hydrogen-Seedant Mixture.** Charles L. Merkle, Gregory A. Molvik and Eric J.-H. Shaw, *Pennsylvania State University* (2, 5, p. 465) Article based on AIAA Paper 85-1544

**B86-079 Initial Tests of a Lightweight, Self-Excited MHD Power Generator.** C. D. Maxwell and S. T. Demetriades, *STD Research Corporation* (2, 5, p. 474) Article

**B86-080 Mobilization of Energy and Space Technology (Durand Lecture for Public Service).** Robert C. Seamans Jr., *Massachusetts Institute of Technology* (2, 6, p. 481) Lecture

**B86-081 Finite Element Application to Rocket Nozzle Aeroelasticity.** D. R. Mason, *Morton Thiokol Inc.*; and P. T. Blotter, *Utah State University* (2, 6, p. 499) Article

**B86-082 Application of MPD Thruster Systems to Interplanetary Missions.** K. Toki, Y. Shimizu and K. Kuriki, *Institute of Space and Astronautical Science, Japan* (2, 6, p. 508) Article based on AIAA Paper 85-2026

**B86-083 ETS-III Ion Engine Flight Operations in the Extended Mission Period.** S. Kitamura and H. Nagano, *National Space Development Agency, Japan*; Y. Nakamura, *National Aerospace Laboratory, Japan*; I. Kudo and K. Machida, *Electrotechnical Laboratory, Japan* (2, 6, p. 513) Article based on AIAA Paper 85-2010

**B86-084 Slag/Seed Interaction in Coal-Fired MHD Generators.** Cesar A. Luongo and Charles H. Kruger, *Stanford University* (2, 6, p. 521) Article

**B86-085 Film Thickness Measurements in a Simplex Swirl Atomizer.** M. Suyari and A. H. Lefebvre, *Purdue University* (2, 6, p. 528) Article

**B86-086 Benefits of Blade Sweep for Advanced Turboprops.** F. B. Metzger and C. Rohrbach, *United Technologies Corporation* (2, 6, p. 534) Article based on AIAA Paper 85-1260

**B86-087 Approach for Obtaining Unbiased Laser Doppler Velocimetry Data in Highly Turbulent Flows.** R. R. Craig, A. S. Nejad, E. Y. Hahn and K. G. Schwartzkopf, *Air Force Wright Aeronautical Laboratories, Wright-Patterson Air Force Base* (2, 6, p. 541) Article

**B86-088 Three-Dimensional Flow Effects in a Two-Dimensional Supersonic Air Intake.** S. A. Fisher, *Aeronautical Research Laboratories, Defence Science and Technology Organisation, Australia* (2, 6, p. 546) Article

**B86-089 Stall Transients of Axial Compression Systems with Inlet Distortion.** F. K. Moore, *Cornell University* (2, 6, p. 552) Article

**B86-090 Optimization of Heat Rejection in Space.** Jack L. Kerrebrock, *Massachusetts Institute of Technology* (2, 6, p. 562) Technical Note

**B86-091 Recent Experiments with the Eindhoven MHD Blowdown Facility.** W. J. M. Balemans, A. J. D. Lambert, H. R. M. van Lierop, P. Massee, W. F. H. Merck, E. M. van Veldhuizen and L. H. Th. Rietjens, *Eindhoven University of Technology, the Netherlands* (2, 6, p. 563) Technical Note

**B86-092 Proposed Laser-Induced Fluorescence Method for Remote Thermometry in Turbine Engines.** B. W. Noel, *Los Alamos National Laboratory*; H. M. Borella, L. A. Franks and B. R. Marshall, *EG&G Energy Measurements, Inc.*; S. W. Allison and M. R. Cates, *Martin Marietta Energy Systems*; and W. A. Stange, *Aero Propulsion Laboratory, Wright-Patterson Air Force Base* (2, 6, p. 565) Technical Note based on AIAA Paper 85-1468
